MUHAMMAD IQBAL

Fullstack Developer | Javascript · Node.js · Laravel/PHP

Jakarta Selatan, Indonesia | 0812-7881-3689 (WhatsApp) | muhammadiqbal190794@gmail.com | linkedin.com/in/mhd-iqbal | github.com/mhdiqbal19

PROFILE

Fullstack Developer with 3+ years shipping complete web and mobile products — from Laravel/PHP backends and REST APIs to React.js, Next.js, Vue.js and Flutter frontends. Experience spans banking, government and enterprise clients, covering database-driven backend systems, authentication, API design, and responsive, component-based frontend delivery. Currently expanding into Node.js/Express to build fully JavaScript-based fullstack solutions alongside the existing Laravel/PHP stack. Comfortable owning a feature across the whole stack and working directly with clients to turn requirements into working software.

EDUCATION

Bachelor's Degree in Information Systems — Universitas Teknologi Yogyakarta (2015 – 2018)
Associate Degree in Informatics Management — Politeknik Negeri Sriwijaya (2012 – 2015)

SKILLS

Backend	PHP (Native), Laravel 9, REST API design, JWT/Token-based Auth, MySQL; currently learning Node.js/Express.js
Frontend	React.js, Next.js, Vue.js, Nuxt.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Mobile	Flutter (Web & Mobile), Dart, React Native
Languages & Runtime	JavaScript, TypeScript, PHP, Dart, Node.js (learning)
Architecture	Component-based & scalable frontend structure, MVC backend structure
Tooling	Git (GitHub/GitLab), Webpack, Vite, npm/yarn, VS Code, Android Studio, Figma
Quality & Ops	Web app build & deployment, cross-browser compatibility, basic unit testing, performance tuning

EXPERIENCE

Frontend Developer — PT. Infosys Solusi Terpadu **Feb 2023 – Present**
Jakarta Raya, Indonesia

- Built client-facing portals for banking clients (Bank Jatim Merchant QRIS, Configuration Portal, Branch Portal) with Next.js, Vue.js and Nuxt.js, integrated against backend REST APIs.
- Worked closely with backend teams on API contracts, JSON data structures and JWT authentication flows.

Frontend Web Developer — Kasir Bersih **Sep 2023 – 2025**
Jakarta Raya, Indonesia

- Developed the Kasir Bersih POS web portal (kasirbersih.id) in React.js, from UI implementation through API integration and state management.

Fullstack Developer — Freelance Software Developer **Jun 2022 – Present**
Remote

- Delivered end-to-end web systems in Laravel 9: a housing management platform for Dinas Perkim Kab. Mukomuko (e-persik.id), an institutional evaluation app for Pemda Kab. Grobogan, and a notarial deed management system for a notary office client.
- Built PHP-native systems including a payroll application for PT. Sinergi Visi Utama, a power plant monitoring system for PLN Keramasan, and a helpdesk app for Politeknik Negeri Sriwijaya.
- Delivered Flutter/Dart mobile UI for Pos Indonesia's Pospay Superapp, and a React.js portfolio site and car-rental booking demo.

IT Staff — Sekolah Islam Al-Fahd **Nov 2018 – Nov 2019**
Palembang, Indonesia

- Handled general IT support and built the school website on CodeIgniter 3 (PHP).

CERTIFICATIONS

- EF SET English Certificate — 94/100 (C2 Proficient)
- Complete React Developer 2023 (Redux, Hooks, GraphQL)
- Bootcamp — Binar Academy, Frontend Engineer (React.js)
- Belajar RESTful API, OpenAPI, dan HTTP untuk Pemula - Udemy
- Pemrograman JavaScript untuk Pemula sampai Mahir – PZN
- Pengelolaan Operasional Pusat Data - Inixindo
- Docker – PZN
